Education	Universidad Rovira i Virgili Ingeniería Técnica de Gestión de Sistemas Informáticos.	2011 – 2014 3 Years
	I.E.S Baix Camp CFGM, Técnico en explotación de sistemas informáticos. CFGS, Administración de sistemas informáticos.	2007 – 2010 2 Years 2 Years
	I.E.S Deltebre CFGM Gestión Administrativa.	2005 – 2006 1 Year

Experience **Freelancer designing websites, Apps and Software in general**

(Currently, I'm developing applications for Android and Android Wear in my free time)

TGram Wear:

<https://play.google.com/store/apps/details?id=org.tgramwear>

TGram Wear is a multi-language application developed in Java for Android, which contains a Telegram and also let you send messages using voice commands and keyboard to your Telegram contacts safely, simple, fast and comfortably.

Send WhatsApp Wear (220 Downloads in less than 1 month):

<https://play.google.com/store/apps/details?id=com.sendwhatsappwear>

Send WhatsApp Wear is a multi-language application developed in Java for Android, which connects with my own Webservice implemented with PHP and MySQL and allows the SmartWatch user to send a message by voice or keyboard to the WhatsApp contacts safely, simple, fast and comfortably.

TV Shows Guide(1.300 Downloads in less than 8 months):

<https://play.google.com/store/apps/details?id=com.tvshowsguide>

TV Shows Guide is a multi-language application developed in Java for Android, which connects with my own Webservice implemented with PHP and MySQL and allows the SmartPhone user to follow his/her favorite TV Shows among the 10,000 TV Shows around the world, along with descriptions and images. It provides to the users, among other things, a weekly dynamic schedule and the ability to synchronize the series with the SmartPhone's calendar. Simple fast and convenient.

More than 5 years of experience creating static and dynamic websites and Web Applications, using technologies such as HTML, CSS, PHP, JavaScript, Java, JSON, JQuery, AJAX and XML.

More than 2 years of experience teaching: C, PHP, HTML, CSS...

More than 5 years of experience repairing computers.

Senior Developer / ScrumMaster / Team Leader

In vBote I have actively worked on all the company projects since my first day.

Most of the company projects, are multi-platform Web Applications(Windows, Linux, MacOS, iOS and Android) using technologies like C#, VB.NET, Java, Flex, Objective-C, Knockout framework, and JavaScript.

The other company projects, are Applications that were developed over 15 years ago and now we take care of maintenance and development of new components and utilities. Such projects are implemented for Windows and Mac operating systems, and are made using C and C ++.

All the projects are used in the educational sector in the US market, the right above mentioned being a standard in the sector.

During the development of these projects, I have been monitoring all of them, working as ScrumMaster, besidesfully taking the lead of one project, beingthe team leader of two programmers and two testers.

Junior Developer

During the time I worked in Tecnocom, I actively participated on more than 10 different projects, most of them created using technologies like .NET, JQuery, Ajax, JavaScript, CSS, SQL C# and RRSR (Reporting Services); And the type of work was both evolutionary and corrective type.

I also made application migrations to other systems and frameworks.

During the completion of these projects, I actively worked with teams of more than 10 people and with people from other countries speaking in English and using videoconferencing and email.

Web Developer

The university offered a 3-month scholarship for a web application using PHP / SQL but because of their satisfaction with the result, they extended me the contract up to 2 times for a total of 9 months to undertake a number of websites for the same and other departments using technologies such as JavaScript, SQL and Java.

**vBote Innovation
2014-**

Development
department

**Tecnocom
2013 - 2014**

Development
department in the
banking sector

**Universidad Rovira i
Virgili
2012 - 2013**

Mechanical Engineering
department

Internship

During the time I spend in Reddis, I took care of the computers configuration and repair, as well as providing help-desk to all Spanish Reddis network.

Mutua Reddis
2007 - 2007

I.T. Department

Technician / Junior Developer

During the time I worked in NewSoftComputers, I performed repair and configuration tasks of hardware and software systems, such as creating websites and web applications using technologies such as JSP, C#, JavaScript, Java, SQL, PHP, HTML, CSS, Apache, MySQL, Oracle....

NewSoftComputers
2006 - 2007

I.T. Department /
Development
Department.

Internship

During the Internship in Risc, my only job was the installation, configuration and repair of computer systems.

Risc Informàtica
2004 - 2005

I.T. Department

Acquired Skills

- Simple Software development methodology: Scrum.
- Experience as Team Leader.
- Programming languages: Java, C, HTML, C#, VB.NET, SQL, Flex, JQuery, AJAX, Knockout, CSS, PHP, Java Script, Flash and Python.
- Advanced knowledge of SSRS.
- Advanced knowledge of software for code improvement such as SonarQube + Jenkins. .
- Windows and Linux servers.
- Windows and Unix networks
- Server technologies like: MySQL, Oracle, Apache, Tomcat.
- Operative Systems like: Windows, Linux, Mac, Android and iOS.

Language Skills

- Spanish: Written: Native; Spoken: Native; Translation: Native; Technical: Native.
 - Catalan: Written: Native; Spoken: Native; Translation: Native; Technical: Native.
 - English: Written: Normal; Spoken: High; Translation: High; Technical: High.
- * I'm getting prepared to take the test FIRST (B2) to have the official qualification of the knowledge I already have.
